

JVP 4x4 Assessment of contribution to WELL prerequisite credits.

The following is an assessment of the main contributions, related to the JVP 4x4 product range, useful to achieve the main credits of WELL certification.

Credits	Requirements WELL	JVP Conformity and Contribution
Materials		
X10 Volatile Compound Reduction	This WELL feature requires the restriction of hazardous VOC and SVOC compounds, halogenated flame retardants (HFRs), urea-formaldehyde and select phthalates commonly used in building materials and products.	JVP 4x4 products have Indoor Air comfort Gold VOC emission test. This test demonstrates the product conformity to Well certification.
X11 Long-Term Emission Control	This WELL feature requires testing and adherence to emission thresholds for newly purchased furniture and furnishings, flooring and insulation.	JVP 4x4 products have Indoor Air comfort Gold VOC emission test. This test demonstrates the product conformity to Well certification.
X13 Enhanced Material Precaution	This WELL feature requires screening and labeling of products in accordance with programs that restrict the use of hazardous ingredient contents in materials and products.	JVP has, for its products range, C2C Cradle to Cradle Certified document, compliant with credit requirements.
X14 Material Transparency	This WELL feature requires the compilation and availability of product descriptions, with ingredients evaluated and disclosed down to 1,000 ppm, through transparency labels.	JVP has, for its products range, C2C Cradle to Cradle Certified document, compliant with credit requirements.
