

# JVP

Raised access floor  
Pavimento **sopraelevato** accessibile

## Hypothetic outside use of JVP 4x4 panels, explanatory note.

All JVP 4x4 panels, for all the systems, are made by a galvanized steel capsule which wraps with glue as well as mechanical fixing the internal core in chipboard or calcium sulphate are suitable only for internal uses, nont forecasting constant exposure to water nor excessive moisture:

The used steel is DX51D+Z100, hot deep galvanized with sendzimir method, useful for internal uses non forecasting constant exposure to water nor excessive moisture

Due to the above-mentioned reasons, any possible use for outside application of the JVP 4x4 panels is forbidden, and to forget this mandatory instruction will drive to a warranty forfeit as well as of any technical JVP's responsibility assumption.

We hope that the information contained on this document is useful and of interest, but should you require further clarification, please let us know.
